

DuraWarning Tape

PRODUCT DESCRIPTION

DuraWarning Tape alerts construction workers to the presence of underground communications ducting. It is typically laid 100-150 cm above a duct or bundle in a trench. DuraWarning Tape can be printed with the name and contact details of the infrastructure owner.

APPLICATION AREA

For use in direct-buried applications.

MAIN CHARACTERISTICS

Material

Material:	Polyolefin
-----------	------------

Temperature

Installation:	+5 °C to +40 °C
---------------	-----------------

Transport and storage:	+5 °C to +25 °C (inside)
------------------------	--------------------------

Pressure

UV resistant:	No
---------------	----

Operational lifetime:	25+ years
-----------------------	-----------

Thickness:	0,08 ±0,008 mm
------------	----------------

Width:	100 or 220 ±10mm
--------	------------------

Standards

General:	ISO 1183-2, ISO 527 -1, 3
----------	---------------------------
